Chairman's Message

HE Engineer Abdullah Mohammed Noor Rehami

Chairman of the Board of Directors of the Arabian Cement Company

Dear stakeholders, It's our pleasure to present the first annual environmental, social and governance (ESG) report of the Arabian Cement Company (ACC), which covers a year of growing achievements in ESG area. This report brings into light our team's passion and devotion to achieving leadership in ESG practices.

Despite the big and unexpected challenges, the world has gone through including the climate change conditions during the past two years, we are proud that we have been successfully resilient in withstanding these challenges, and that ACC has remained steadfast in the face of all difficulties. These circumstances have even strengthened our understanding of the importance of ESG practices and the need to place them at the heart of our organizational planning, and also the importance of disclosing our non-financial performance to our valued stakeholders. Driven by our values of transparency and trust, our team has compiled this report to keep you always updated of our ESG performance in accordance with the Global Reporting Initiative (GRI) Standards and the United Nations Sustainable Development Goals (SDGs) to be the first cement company in the Kingdom and GCC region to commit itself to sustainability in all its activities and to improving the communities in which it operates, as well as to fulfilling its economic, social and environmental responsibilities.

In addition to recognizing and managing the various environmental impacts of our activities, we also focus on enhancing sustainable growth in the cement industry.

Across all our activities, we have adopted the highest health, safety and environment (HSE) standards to preserve the health and safety of our employees and other stakeholders, while committing to environment protection and continuity of our business.

We have a clear vision to be the leading Saudi company in the cement industry in The Kingdom of Saudi Arabia. We are still focused on promoting smart and sustainable growth that contributes to the diversification of the Kingdom's economy while ensuring the protection of the planet and its ecological diversity.

CEO's Message

Dr. Eng. Badr Osama Johar

CEO of Arabian Cement Company

Dear stakeholders, this is with great pleasure to present our first annual ESG report for the fiscal year ending on December 31, 2023. Recognizing that we are an integral part of the Saudi society and understanding our responsibility towards future generations have led us to link our ambitions and commit ourselves to the best ESG practices. This year's report provides a comprehensive view of our genuine effort to build our strategy in accordance with the best ESG standards and global standards, providing key highlights and achievements related to all ESG aspects.

The start of our journey towards adopting the best ESG practices has been marked by winning the ISO 9001:2015 - Quality Management Systems certificate and ISO 14001:2015 - Environmental management systems, and forming a Board committee entrusted with governance and social responsibility, besides Risk Management Committee, which would be the main driving force towards further strengthening ESG practices. We also seek to unleash our ESG potential through further governance engaging more male and female employees in senior management and decision-making positions.

Given that the strength of any organization is measured by values that cannot always be measured, we enhanced our social performance this year by developing human capital and launching a number of impactful social initiatives. Being an industrial company, Safety will always be at the top of our daily concerns. That's why we have continued furthering our health and safety procedures.

While giving due account to global environmental situation and environmental vulnerabilities of the Kingdom, we will continue measuring our emissions footprint and our efforts to mitigate and adapt to the climate change effects in our country.

In conclusion, I would like to express, on behalf of ACC, my sincere appreciation to all stakeholders involved in developing this report. We hope that you will find the report useful and transparent, and we are pleased to receive any inquiries or comments from you.

1. Introduction

Introduction

Overview of the Report

A) Scope of the report

Driven by our keenness to maintain sustainable growth, we adopt the best ESG practices in our operations and activities, in the belief that ESG practices are key to the success and sustainability of our business. We also believe in our ability to achieve good performance in our business and support the local community. Our business model is well-positioned to implement our strategy as approved by the Board of Directors and is well crafted to suit our business environment.

In line with our ESG-oriented business model, and our commitment to communicating sustainability and non-financial disclosures to stakeholders, we present this second annual ESG report.

Through this report, ACC aims to:

- A) Reconfirm its commitment to efficiency and its values.
- B) Maintain its commitment to transparency towards all stakeholders.
- C) Consolidate its ongoing efforts towards sustainability in the Saudi stock market and other international stock markets, paralleled with its commitment to the Saudi's Vision 2030.

This report has been prepared in accordance with GRI1¹ standards, with the 17 SDGs of the UN in mind.

This report has not been audited by any independent auditor.

The report covers ACC's operations and activities but it doesn't cover those of its subsidiaries or the companies in which it holds stakes.

B) Comments and Feedback

Please feel free to contact us if you have any comments or feedback on this report, or to obtain more information about ACC's performance in relation to ESG practices:

Governance and Social Responsibility Committee

Address: 8605 King Abdulaziz Road, Al Nahda District, Jeddah 23523, Kingdom of Saudi Arabia

¹ This means that this report has met at least all GRI-related standards, which have been considered material across all sections of the report (according to the GRI standards, material topics are topics that an organization prioritizes for inclusion in its reports. This prioritization is made according to the principles of stakeholder inclusion and materiality. The principle of materiality determines the material topics based on the following two dimensions: The topic that reflects a reporting organization's significant economic, environmental and social impacts; or that substantively influences the assessments and decisions of stakeholders

2. About the Company

A. Overview

ACC is a Saudi joint stock company established in accordance with the Saudi Companies Law pursuant to Royal Decree No. 731 of Jumada al-Awwal 12, 1374 AH corresponding to January 5, 1955 AD. The Company operates under Commercial Registration No. 4030000148 issued in Jeddah on Ramadan 14,1376 AH corresponding to April 13, 1957 AD. Founded by King Saud bin Abdulaziz, may Allah have mercy on him, in Jeddah in 1376 AH (1957 AD) with a production capacity that amounted to 2,000 tons per day of clinker cement in 1395 AH (1975 AD), ACC is considered the first cement company in the Kingdom and GCC region. Then due to urban expansion, the Company's factory was relocated to Rabigh in 1404 AH (1984 AD) where it reached a production capacity of 4,000 tons per day of clinker cement, and was opened by the Custodian of the Two Holy Mosques, King Fahd bin Abdulaziz, may Allah have mercy on him, in 1406 AH (1986 AD).

B. Vision & Mission

- **Vision:** To be the leading Saudi company in the cement industry in the Kingdom of Saudi Arabia.
- **Mission:** Maximizing the economic returns for all relevant parties through our commitment to the best commercial practices to provide high quality products according to international standards.

C. ACC's Strategy

ACC has developed strategic plans in line with the future vision in order to face potential challenges and keep pace with the economic developments that the Kingdom is experiencing, with the aim of achieving continued development and growth and generating a rewarding return for its shareholders. Over the past years, ACC has worked to meet the needs of the local market and provide the highest levels of quality and flexibility to serve its customers. It also worked to improve the efficiency of its operations and reduce costs, with a view to achieving its goals, maintain competitiveness and maximizing its share in the local market.

D. ACC's Policy

ACC is committed to establishing and maintaining high health, safety, security, and environment "HSSE" standards. ACC is also committed to providing cement products with outstanding quality, consistent with customer requirements and regulatory standards while carrying out the environmental responsibility in a manner that demonstrates true leadership.

ACC is truly dedicated to the following: -

ISO	Implement and maintain the requirements of the international standards, including quality ISO9001:2015 and environment ISO14001:2015 systems.
Environmentally safe	Maintain environmentally friendly operations and work proactively to prevent or minimize the pollution in all areas attributed to our operations.
Safety	Establish and maintain safe work place and conduct operations at minimal risk with a high confidence in our operation integrity, promoting safe work practices which will reduce the potential risks to all our employees, contractors, assets, and protect neighboring facilities and environment.
Conserving the Natural Resources	Conserve the inherent natural resources and improve the protection of these resources by reducing the waste generation and contamination of air, water and land. Ensure any waste expelled to environment is sufficiently safe.
Consulting with Employees	Consult with our employees and relevant parties with regard to health, safety, security, environment, quality, energy saving and reliability, and reward their efforts to improve performance.
Appropriate Training	We provide appropriate and sufficient training for all employees to maintain a skilled workforce and a healthy work environment.
Continuous Improvement	We work for continuous improvement and sustainable development of the Company in all activities and performance.
Reducing Risks	Design, construct, install and maintain the facilities and operations in a way minimize risks and save energy.
Respecting Law	Conduct all our business in compliance with all applicable laws and local regulatory requirements and standards.

This policy forms an integral part to setting our Company's objectives and targets. This policy is communicated to all employees, consultants, contractors and suppliers. ACC is always ready to answer any request from the regulatory authorities and stakeholders, including neighboring facilities.

E. Activities of ACC and its subsidiaries

ACC operates in:

- Production of clinker², cement, building materials, related products, and derivatives inside and outside KSA.
- Trading in clinker, cement, building materials, related products, and derivatives inside and outside KSA.
- Utilization of quarries, as well as establishment of plants and warehouses required for the Company's purposes, namely manufacturing, storage, sale, purchase, import, export, and carrying out other complementary and supporting industries. To achieve such purposes, ACC may conclude all types of contracts for real estate and movable properties and enter into any type of other agreements pursuant to the applicable laws.

ACC carries out its activities in accordance with the applicable laws and after obtaining the necessary licenses from the competent authorities, if any.

ACC produces four main types of cement with high quality according to the approved local and international specifications:

- Ordinary Portland³
- Portland pozzolana
- Sulphate-Resistant
- Portland Limestone

ACC's main operations to produce cement and clinker are managed through the company's plant. The plant located in Rabigh Governorate, north of Jeddah, and near the Company's main markets. Owing to the increasing demand for cement, an expansion (line 5) was commissioned in 1417 H (1996) with a production capacity of 4,000 tons per day of clinker, raising the designed capacity to 8,000 tons per day of clinker. In 1430 AH (2009 AD) a new expansion (line 6) was commissioned with an advanced technology and production capacity of 7,000 tons per day of clinker, and the other four old lines were shut down. The designed production capacity thus was increased to 11,000 tons per day of clinker. Further, ongoing improvements in operations resulted in achieving high operating and functioning rates, whereby the production capacity of the Company's plant reached 12,200 tons per day of clinker, which equals 13,000 tons of Ordinary Portland Cement (OPC) per day. ACC has cement grinding capacities exceeding 25000 tons per day.

² It is a semi-finished cement product in the form of black granules, which is a mixture of raw materials that have been burned in kilns. It is the pre-final stage of cement production

³ Portland cement is a final cement product and is typically used for general construction purposes such as footings, roofs and walls

F) Production and Markets Volume:

According to industrial license No. 45111012888 issued on 19/01/1445 AH, ACC production capacity as licensed by the Ministry of Industry and Mineral Resources is as follows:

Product	Production Capacity
Salt Resistant Portland Cement	1.5 million tons
Cement Clinker	1.0 million tons
Ordinary Portland Cement	4.0 million tons
Portland Cement	3.5 million tons

The Company aims to sell its products in the local market, and the available export markets. The currently designed production capacity of ACC plant has reached 3.8 million tons of clinker per year with a grinding capacity amounting approximately to 6 million tons per year.

Statement	2023	2022
Total production capacity of cement sector in the Kingdom (million tons)	72.00	72.00
Production capacity of ACC (million tons)	4.01	3.80
Company's share of total (%)	5.57	5.27

The latest statistics announced on the economic websites and information obtained from the Saudi National Committee for Cement Companies indicate that the total designed capacities in KSA amounted to approximately 72 million tons of clinker by the end of 2023 (72 million tons of clinker by the end of 2022) without any additional expansion in production capacities. The actual production during the year of 2023 reached 57.4 million tons of clinker, at the same production capacity of the previous year 2022. Regarding KSA demand for cement, the demand for cement in 2023 has significantly dropped by 6.9% compared to the previous year, reaching 47.3 million tons, as a result of the slowdown in construction works on a number of vital and residential projects in the region. It is worth noting that the cement sector in KSA operate with equivalent utilization rate of 60% of the available design capacities, which continuously places pressure on the profit margins and the performance in general. Also, the high production costs and the company's continuing to export the cement to control the inventory levels and avoid overstocking have led to increase in exports compared to the previous year, where more than 6.4 million tons of clinker and 2.1 million tons of cement were exported during the current year, due to the decline of domestic demand levels during the past year, after its stability during the past three years (2020-2022).

Statement	2023	2022
Number of companies operating in the cement sector in the Kingdom	17	17

The number of companies operating in the cement sector doubled during the period from 2005 to 2015, reaching 17 companies compared to only 8 companies in 2005. The increased number of competitors and increased volume of production capacities in the market during the same period led to a production surplus in a number of regions above their actual needs despite the fact that the market has absorbed that production until the year 2015. Then the demand began to decline leading to significant price slump. KSA cement market has been hit by recession in 2016. Consequently, signs of economic recovery have shown over the second half of 2019, due to the support provided by the government of the Custodian of the Two Holy Mosques through various programs that contributed by the provision of housing or appropriate financial aid to citizens and major infrastructure projects. The demand continued to recover during the first half of 2022 as result of the continued support for housing projects by the Ministry of Municipal and Rural Affairs and Housing. However, the real estate market activity witnessed a remarkable stagnation during the second half of the year 2022. It concentrated more in the residential sector, which was affected by the changes that occurred in several key factors, the most important of which is the decline in the growth rates of real estate loans granted to individuals, as the value of real estate loans granted to individuals decreased by 35% from the previous year to 77.7 billion riyals for the first time since 2018, as a result of high interest rates (mortgage cost) and the accompanying update on housing support programs provided to citizens with the aim of directing support to the most needy groups. Furthermore, the continued high interest rate affected the volume of real estate developers work in expanding residential projects and selling off-plan "WAFI".

During the year 2023, the market share of Arabian Cement has grown, thank God, in contrast to the performance of the sector in general and the performance of the market in the Western Region, while ACC expects an improvement in the performance of the construction sector during the second half of next year 2024, and upturn in vital projects of the Public Investment Fund (PIF) in Makkah and NEOM project in the north of Saudi Arabia.

Recent statistics on local deliveries of Saudi cement companies indicate that KSA western region's share of total deliveries amounted to 26.1% during 2023. It is expected that such share will increase upon commencing several announced strategic projects and PIF projects, in addition to the continued work on the Two Holy Mosques and Housing projects. Moreover, the presence of a few companies operating in the western region near the Red Sea provides a port for export to neighboring countries. ACC has exported its products to foreign markets during 2023 to support the Company's sales with more than 329,000 tons of cement and clinker, which helped reduce the company's inventory and support its cash position.

G) Arabian Cement Bahrain Holding Company — Subsidiary:

In 1438 AH (2007 AD), ACC established the Arabian Cement Bahrain Holding Company S.P.C. ("Arabian Cement Bahrain"), which is 100% owned by ACC. Arabian Cement Bahrain is a single person company (SPC) registered in the Kingdom of Bahrain for the purpose of managing ACC subsidiaries, investing its funds in stocks, bonds and securities, owning real estate and movables necessary to carry out its activity, and providing loans, guarantees and financing to its subsidiaries.

Arabian Cement Bahrain holds a stake in Qtrana Cement Joint Stock Private Company (“Qtrana Cement. Company) in the Hashemite Kingdom of Jordan. Arabian Cement Bahrain owns 86.74% of Qatrana Cement shares and has control over the business and management of Qatrana Cement Company. Thus, Qatrana Cement Company is considered an indirect subsidiary of the parent company (ACC). Qatrana Cement operates in the production of black Portland cement, white cement and calcium carbonate. The production capacity of the Qatrana Cement Company is 5,000 tons per day of clinker cement (equivalent to 5,300 tons per day of ordinary Portland cement), and 1.8 million tons of clinker per year. The cement grinding capacity of Qatrana is about 2 million tons per year. The company targets Jordanian markets, as well as exporting to a few neighboring countries. Qatrana Cement started its commercial operation phase in 1432 AH (2011 AD).

Statement	2023	2022
Total designed capacities of the cement sector in the Hashemite Kingdom of Jordan (in million tons)	8.0	8.0
Qatrana Cement Private Joint Stock Company grinding capacity (in million tons)	2.0	2.0
Market share of Qatrana Cement Private Joint Stock Company in the Jordanian Market (%)	25%	25%

According to the information obtained from the Jordan Cement Producers Association, the design capacities of the cement sector in Jordan amounted to 8 million tons of cement per year during the year 2023. The cement sector in the Hashemite Kingdom of Jordan also witnessed a decrease in the demand, as the demand for cement decrease to about 3.50 million tons during the year 2023, which is 6.2% less than the previous year. The market share of Qatrana Cement Company (subsidiary) reached 25% of the Jordanian market. The price stability in the market helped Qatrana to maintain its profits in 2023.

H) Companies in which ACC invests

As of December 31, 2023, ACC's investments in companies in which it holds ownership rights are as follows: -

Company	Country of Establishment	Main Activity	Ownership Percentage %		Investment Value as of December 31 ⁴ Saudi Riyals (in thousands)	
			2023	2022	2023	2022
Ready-Mix Concrete and Construction Supplies Company	Hashemite Kingdom of Jordan	Concrete Production	36.67%	36.67%	20,516	20,516
Cement Product Industry Co. Ltd. ⁵	Hashemite Kingdom of Jordan	Cement Bag Manufacturing	33.33	33.33	46,646	46,646

⁴ Through equity right

⁵ Cement Product Industry Co. Ltd. is a limited liability company whose Articles of Association is officially recorded with the Notary Public in Jeddah under the company contracts registry for the year

I) Raw materials used by ACC in the cement industry

The following table includes details of the raw materials used by ACC in the cement industry, along with details of the licenses it obtained from the Ministry of Industry and Mineral Resources, their percentages and method of supply:

Raw Material	Mining License No.	Mining License Expiration Date	Pure cement in one ton	Mining License Subsidiary	Supply by
Limestone	S/7179	09/10/1468 AH	68-88%	ACC	Contractor
Limestone	S/117	25/11/1459 AH	68-88%	ACC	Contractor
Gypsum	S/7196	09/10/1468 AH	3-5%	ACC	Contractor
Clay	S/7198	09/10/1468 AH	7-10%	ACC	Contractor
Clay	M/17	11/04/1454 AH	7-10%	ACC	Contractor
Pozzolan	S/8002	20/08/1456 AH	20-30%	ACC	Contractor
Pozzolan	S/4131	12/05/1456 AH	20-30%	ACC	Contractor
Iron One	S/31	22/07/1455 AH	2-4%	ACC	Contractor
Iron One	S/33	21/03/1451 AH	2-4%	ACC	Contractor

Currently unexploited* (strategic stock)

Subject to the terms and conditions of mining licenses, the Ministry of Industry and Mineral Resources may cancel the license of any quarry in the following cases:

- The company defaults on payment of the Ministry's dues for 150 days.
- The company provides invalid information to the Ministry.
- The company fails to implement the obligations imposed by the Mining Investment Law, its implementing regulations, or the mining license within a period of sixty days after receiving written notice from the Ministry.
- The company fails to rectify any situation that may endanger the health and safety of its employees or other parties or threatens to cause damage to mineral formations for more than sixty days after receiving written notice from the Ministry.
- The company fails to take the necessary measures to preserve the environment, wildlife, archaeological sites, or tourist areas for more than sixty days after receiving written notice from the Ministry.

If ACC does not adhere to the terms and conditions of mining licenses in the future, its license may be withdrawn from it and consequently it will not be able to continue practicing its business activity. This will have a negative impact on ACC's business, operation outcomes and financial position.

1392/91 number (55), dated 11/7/1392 H, as amended. Three major cement companies in the Kingdom of Saudi Arabia jointly founded this Company in 1972 with equal shares: Saudi Cement Company, Yamama Cement Company, and Arabian Cement Company. Since its establishment, the Company has expanded its operations, and has now become one of the leading manufacturers of cement bags in the entire Middle East. The factory is located in the King Abdullah Economic City - Industrial Valley, and its design capacity exceeds 360 million bags annually with five production lines employing the latest technologies.

2. ESG Practices in Arabian Cement Company

ESG Practices in Arabian Cement Company

1) Introduction

In alignment with the priority of engaging stakeholders, ACC shall determine the relative importance of issues significant to both internal and external stakeholders by involving them in the determination process. ACC acknowledges the importance of aligning its strategy and direction with international and national sustainability frameworks, as well as environmental, social, and governance (ESG) practices. It also supports the achievement of the United Nations Sustainable Development Goals, Saudi Vision 2030, and other areas related to environmental and social governance and corporate governance.

2) Governance and Social Responsibility Committee

The approach to environmental, social, and governance practices at ACC has been expedited through the establishment of Governance and Social Responsibility Committee, a multifunctional committee derived from the Board of Directors. The Committee shall develop a general strategy related to environmental, social, and governance issues. It ensures oversight for the appropriate integration of environmental, social, and governance practices with policies and initiatives, communication with stakeholders, company development, and overall understanding.

Statement	2023	2022
Number of meetings of the Governance and Social Responsibility Committee during the year	5	4
Attendance Percentage	100%	100%

During 2023, the Committee convened 5 times to discuss emerging environmental, social, and governance (ESG) topics, covering the Company's performance in ESG practices, related initiatives, ESG strategy, ESG assessments practices and governance.

The tasks of the Governance and Social Responsibility Committee can be summarized as follows: -

- A) Develop specific governance rules for the Company (Governance Regulations), monitor their implementation, verify their effectiveness, and amend them when necessary, subject to approval by the Board of Directors.
- B) Verify the Company's compliance with governance rules.
- C) Review and update governance rules of the Company in accordance with regulatory requirements and best practices.
- D) Review and develop the code of professional conduct representing the Company's values.
- E) Regularly inform the Board of Directors about corporate governance developments, best practices, and provide annual reports and recommendations.
- F) Review human resources management issues, including HR policies and procedures, Company structure, and Saudization⁶ rates in line with the regulations of the Ministry of Human Resources and Social Development and Nitaqat Program.

⁶ Saudi Arabian Labor Regulations that mandate companies operating in the Kingdom to employ a specific percentage of Saudi nationals

- G) Develop an orientation program for new board members covering all key areas related to the nature of the Company's business.
- H) Develop programs and identify necessary means to propose the Company's initiatives in the social field, and monitor their implementation as delegated by the Board of Directors.
- I) Propose to the Board of Directors a policy ensuring a balance between the Company's objectives and the societal objectives sought to be achieved for the development of the community, subject to presentation to the General Assembly.
- J) Establish performance indicators connecting the Company's performance with its social initiatives and compare them with other companies in similar activities.
- K) Disclose the social responsibility objectives adopted by the Company to its employees and raise awareness and educate them about these objectives.
- L) Disclose plans for achieving social responsibility in relevant periodic reports on the Company's activities.
- M) Develop foundations and standards of social responsibility for the Company.
- N) Prepare an executive plan and an estimated budget for social responsibility programs.

Below is a list of the members of the Governance and Social Responsibility Committee:

- A) Eng. Walid Abdul Razaq Al-Deraian — Independent Member.
- B) Mr. Turki Abdullah Al-Rajhi — Non-Executive Member.
- C) Mr. Youssef Saleh Aba Al-Khail — Independent Member.

3) Stakeholder Engagement

ACC shall learn the opinions and priorities of key stakeholders through ongoing meetings and discussions with internal and external stakeholders. This includes employees of ACC, investors, communities, business partners, and others throughout the lifecycle of ACC's activities. The attached Table No. 2 (Areas of Direct Economic Impact Selected by ACC) describes our approach and the frequency of engagement for each stakeholder group, aligning with their priorities.

4) Key Topics

To ensure that relevant information reaches stakeholders, ACC has identified (20) key topics based on the Global Reporting Initiative framework and regional best practices for reporting in this field, taking into account the input of internal stakeholders, current emerging trends and the interests of external stakeholders based on direct communication with them.

Key topics can be found in Appendix No. (3)

3. Governance Practices at ACC

Governance Practices at ACC

1) Corporate Governance

A) Introduction

ACC has been diligently applying corporate governance since the issuance of the Corporate Governance Regulations by the Saudi Arabian Capital Market Authority on November 12, 2006, and the new Governance Regulations issued on February 13, 2017, as amended. The Company established an effective governance system, acknowledging its long-term importance, fostering relationships with all stakeholders, and adhering to the principles of disclosure and transparency. The Board of Directors adopted the second edition of the Company's Governance Regulations on December 3, 2017, to maximize the interests of all stakeholders in the long run, along with documenting governance policies and procedures. ACC deposited a copy of the approved Governance Regulations with the Capital Market Authority's Governance Department. In addition, the various departments of ACC have contributed to supporting and strengthening the Company's governance system. All departments have embraced best practices to protect the interests of all stakeholders.

ACC has developed and approved policies that ensure compliance with official regulations and laws. The Company is also committed to disclosing essential information about its operations and performance, aiding shareholders and investors in evaluating ACC.

B) General Overview on Ownership Rights

ACC is a publicly listed joint-stock company on the Saudi Arabian Stock Market with an authorized, subscribed, and fully paid capital of (SR. 1,000,000,000), divided into (100,000,000) shares. The nominal value per share is (SR. 10), and the book value is (SAR 27.50). The corporate governance of ownership rights at ACC is subject to meticulous supervision, ensuring compliance with the Corporate Governance Regulations.

During 2023 and 2022, there were no changes in the Company's authorized or subscribed capital.

C) Level of Compliance with Corporate Governance Regulations

ACC shall adhere to all mandatory provisions outlined in both the Companies Law issued by the Ministry of Commerce, the Corporate Governance Regulations, and the "Regulations and Regulatory Procedures Issued Pursuant to the Companies Law for Listed Joint Stock Companies" issued by the Saudi Capital Market Authority. Additionally, the Company complied with several advisory provisions mentioned in the Corporate Governance Regulations, as follows: -

Article Title	Article Number in the Regulations
Formation of Risk Management Committee	67
Terms of reference of Risk Management Committee	68
Meetings of Risk Management Committee	69
Formation of Internal Audit Unit or Department:	73
Internal Audit Plan	74
Internal Audit Report	75

Organizing Relationship with Stakeholders	80
Social Responsibility	84
Social Initiatives:	85
Formation of Corporate Governance Committee	92

* Pursuant to the decision of the Board of Directors of the Capital Market Authority No. (5008/2023) dated 18/10/2023 AD, these Articles became mandatory starting from 01/10/2024, corresponding to 19/06/1445 AH.

ACC will adhere to these Articles.

The following details outline the specific provisions from the new Corporate Governance Regulations that were not adhered to during 2023.

Text of Article/Paragraph	Article/Paragraph Number in the Regulations	Reason for non-application
Developing the necessary mechanisms for Board members, committee members, and the Executive Management to continuously enroll in training programs and courses in order to develop their skills and knowledge in the fields related to the activities of the Company.	Article (37), Clause 2: Training	The Article is still advisory
The individual evaluation of the Board members shall take into account the member's effective participation and commitment to performing his duties and responsibilities, including attending the Board and its committees' meetings and allocating the necessary time for them. Establishing social institutions for company employees	Article (83), Clause 3: Employees Incentives	The Article is still advisory

D) Corporate Governance Excellence Award

ACC received the Corporate Governance Excellence Award three consecutive times in 2020, 2021 and 2022. This award, granted by the Corporate Governance Center at Al-Faisal University, recognizes the Company as one of the best-performing entities in governance among 246 companies listed on the Saudi Stock Market (Tadawul).

The evaluation by Al-Faisal University's Corporate Governance Center is based on a scientific index that assesses corporate governance performance in four pillars: the Board of Directors, shareholder rights, public disclosure and transparency, and stakeholder rights.

2) Board of Directors and Emanating Committees

ACC's Board of Directors shall develop the Company's operations and achieving continuous returns for shareholders. This is accomplished through the Board of Directors and the executive management, specifically by instilling corporate values and governance standards. These standards include, in particular, the rules set by the Capital Market Authority to protect the rights of shareholders and other stakeholders. ACC shall also ensure the application of governance rules in all its professional and ethical dealings. Likewise, the Board of Directors shall aim to enhance a culture of commitment by establishing policies, procedures, and internal regulations based on sound governance principles and Compliance Regulations during the Company's daily industrial and commercial activities.

These procedures are designed to boost the confidence of shareholders and other stakeholders. The governance framework shall undergo regular review by the Board of Directors, which establishes executive strategies and policies to maintain a robust governance system.

ACC's Board of Directors consists of nine members elected by the General Assembly (five independent and four non-executive). The board members shall possess notable expertise in manufacturing, trade, economics, governance, risk management, and strategic planning.

The Board of Directors at ACC plays two key roles within the Company: a supervisory role and an oversight role:

- A) For the supervisory role: The Board of Directors shall oversee the strategic and operational direction of the Company, balancing its decisions among different risks, threats, opportunities, and gains.
- B) For the oversight role: The Board of Directors shall monitor the executive management, ensuring that it works diligently in the interest of stakeholders. The Board shall also supervise the Company's legal and regulatory compliance, internal confirmation activities (such as internal audit and risk management), and monitor external confirmation activities (such as external audit reviews).

The responsibilities of Board members are independent and distinct from the responsibilities of executive management, thus allowing the Board to maintain its supervisory and oversight roles, contributing effectively by fulfilling its responsibilities to the fullest.

56%	ACC's Board Independency
------------	---------------------------------

The following provides more details about the members of the Board of Directors:

Name and Classification of Membership:	Nationality	Qualifications and Experience
HE Engineer Abdullah Mohammed Noor Rehami (Chairman of the Board - Independent Member)	Saudi	Bachelor's degree in Mechanical Engineering. Extensive experience in leadership, management, finance, and strategic planning, having held several important managerial positions in both the public and private sectors, including board memberships in various companies. Formerly, he served as Managing Director and CEO of Savola Group, Chairman of the General Authority of Civil Aviation, and Assistant Director General of the Industrial Development Fund.
Mr. Saud Abdul Aziz Al-Sulaiman (Vice Chairman of the Board – Non-Executive Member)	Saudi	Bachelor's degree in Economics and Finance. 36 years of experience in management, economics, and investment. Currently serving as the President and CEO of Abdulaziz Abdullah Al-Suliman Group. Formerly worked as Vice President at Abdulaziz Abdullah Al-Suliman Group.
Eng. Walid Abdul Razzaq Aldur aian (Board Member - Independent Member)	Saudi	Master's degree in Electrical Engineering. 36 years of experience in management, company founding, training, and education. Currently serves as a managing director at Al Khaleej Training and Education Co. Formerly worked as a General Manager at

		Al- Khaleej Computers & Electronic Systems Co.
Eng. Moataz Qusay Al-Azzawi (Board Member - Non-Executive Member)	Saudi	Bachelor's degree in Computer Engineering. 25 years of experience in investments, construction, capital markets, mergers and acquisitions, and memberships in the boards of several listed companies. Currently service as member of directors of his own company.
Mr. Turki Abdullah Al-Rajhi (Board Member - Non-Executive Member)	Saudi	Bachelor's degree in Industrial Management. 26 years of experience in management and industry. Formerly served as a General Manager at the National Factory for Polyester Fibers, and General Manager at Al-Rajhi Plastic Factory.
Mr. Fahd Abdullah Al-Eissa (Board Member - Non-Executive Member)	Saudi	Master's in Business Administration. 16 years of experience in investment, banking, and finance. Currently serves as the CEO of Amyas Holding Company. Formerly worked as CEO of Investment at Amyas Holding Company, Investment Banking Manager at Jadwa Investment, and Financial Analyst at J.P. Morgan Bank.
Mr. Abdulatif Ali Al-Seif (Board Member - Independent Member)	Saudi	Master's in Economics and Master's in Business Administration. Mr. Abdulatif Ali Al-Seif 22 years of experience in credit, finance, and investment. Currently serving as a Managing Director and CEO of Sabeen Investment Company. Formerly worked as CEO of Riyadh Investment Company, Deputy CEO of King Abdullah Humanitarian Foundation, Portfolio Manager at Musk Company, and Head of Investment Portfolios at Saudi Arabian Oil Company (ARAMCO).
Mr. Youssef Saleh Aba Al-Khail (Board Member - Independent Member)	Saudi	Master's in Information Sciences and Systems. 36 years of experience in the government and private sectors, with participation in leadership and memberships in joint-stock companies and their committees.
Eng. Muhammad Hamed Al- Kulaibi (Board Member - Independent Member)	Saudi	Bachelor's in Industrial Engineering and Mini Master in Business Administration. 28 years of experience in managerial and consulting roles. Currently serving as CEO of Ibdaa Watan Food Trading Co., formerly worked as Deputy CEO of United Sugar Company, Deputy CEO and Senior Executive Manager of Savola Company, and Advisor to the Minister of Economy and Planning and the Minister of Hajj and Umrah.

The report concludes with a statement listing the names of companies inside or outside the Kingdom in which Board members currently or previously held membership or had an executive role.

In 2023, during the last term of the Board, there was no female representation on the Board, but we believe that a diverse Board would enhance the performance of the Company.

Statement	2023	2022
Number of board members	9	9
Number of board male members	9	9
Number of Board of Directors meetings during the year	5	5
Average Attendance Rate	%100	%98

The Board of Directors shall meet several times during the year, and comprehensive details of the Board of Directors' meetings shall be disclosed in the annual report of the Board of Directors. During 2023, the company's Articles of Associations were amended to make the Board's term four years instead of three. The current term of the Board of Directors began on January 1, 2024 and ends on December 31, 2027.

A) Election of Board Members

ACC shall consider recruiting qualified and experienced individuals to its Board of Directors and its committees to serve the interests of the Company, its shareholders, and other stakeholders. The Nomination and Compensation Committee shall assist in selecting and appointing members of the Board of Directors and its committees, recommending nominations and re-nominations according to the required membership criteria set by the relevant regulations issued by the Capital Market Authority. These criteria aim to establish a Board capable of outstanding performance from all aspects.

The General Assembly shall elect the members of the Board of Directors through cumulative voting, and the term of membership in the board shall be three years, renewable.

B) Powers, Responsibilities, and Duties of the Chairman of the Board of Directors

The Chairman of the Board holds non-executive powers, playing a pivotal role in encouraging an open environment based on effective dialogue, discussing challenges and issues timely. In addition, the Chairman ensures the independence of the Board and its ability to make decisions that ensure the Company's public interest. His duties and responsibilities include, but are not limited to:

- Ensuring that the Board discusses all fundamental issues efficiently and in a timely manner.
- Representing the Company in accordance with its bylaws.
- Encouraging all Board members to fully and effectively participate in managing Board affairs to ensure the Board acts in the Company's best interest.
- Ensuring effective communication with shareholders and conveying their opinions to the Board.
- Creating an atmosphere that encourages constructive criticism of issues where there are differences in views among Board members.

C) Committees Emanating from the Board of Directors

Four committees emanate from the Board: Audit Committee, Risk Management Committee, Compensation and Nomination Committee, and Governance and Social Responsibility Committee. Audit Committee shall be formed, either by shareholders or others, by a resolution of the Ordinary General Assembly, while the remaining committees shall be formed by the Board of Directors.

The Board shall ensure the formation of these committees through resolutions that specify the committee's duration, powers, responsibilities, how the Board oversees them. The resolutions to form the committees shall include naming the members, defining each committee's task, setting its term, specifying its powers during this period, and outlining the Board's supervision mechanism. Each committee shall transparently communicate its findings and resolutions to the Board. The Board shall regularly monitor these committees to ensure they perform their assigned tasks. Each committee shall be accountable for its actions before the Board, and this shall not diminish the Board's responsibility for such actions and the authorities delegated to the committees. All committee members, whether internal or external to the Board, shall be independent or non-executive.

Committee	Number of Members	Number of independent members and members from outside the Board	Number of Meetings		Attendance Percentage	
			2023	2022	2023	2022
Audit	4	1 independent and 1 from outside the Board	4	4	94%	100%
Risks	3	1 from outside the Board	2	2	100%	100%
Remuneration & Nomination	3	2 independent	5	5	100%	100%
Governance and Social Responsibility	3	2 independent	5	5	100%	100%

The comprehensive disclosure of details regarding the meetings of all committees shall be provided in the annual report to the Board of Directors.

In 2023 and the last cycle of committees emanating from the Board of Directors, there was no representation of women in these committees.

D) Evaluation of the Board of Directors and its Committees' Performance

Nomination and Remuneration Committee shall consistently and systematically conduct evaluations of the Board of Directors and its committees. This process aims to ensure compliance with governance standards at the highest levels and achieve equality. Since 2016, the Nomination and Remuneration Committee has internally developed and approved a model for evaluating the performance of the Board of Directors and its committees. Board members participated in the evaluation by expressing their opinions. Subsequently, the Committee analyzes the evaluation results and presents recommendations to the Board of Directors.

E) Board of Directors and its Committees' Remuneration

ACC shall adhere to the highest standards of sound governance, transparency, integrity, honesty, and accountability, all of which are reflected in its practices and governed by its remuneration policy. The remuneration policy of ACC shall establish principles related to the remuneration of the Board of Directors, its committees, and the executive management to align with the Company's objectives and performance, taking into consideration the integrity of its operations and financial position. This policy shall be an integral part of the comprehensive corporate governance framework. The Nomination and Remuneration Committee shall be responsible for implementing this policy and reviewing it annually. Shareholders have approved all remunerations for the Board of Directors in the annual general meetings, indicating a consensus on payment.

Comprehensive disclosure of the fixed and variable remunerations for all Board and committees members shall be provided in the annual report to the Board.

3. Executive Management

The success and sustainability of any company is a determining factor in the quality of its internal processes and organization. As Arab Cement Company seeks excellence, it has structured its organizational framework in alignment with its aspirations to ensure compliance and conformity with environmental, social, and governance standards, while also considering other institutional goals and purposes. Annex (5) shows a summary of the organizational structure, including positions in hierarchical order for all committees of the Board of Directors, administrators, managers, and executives. The organizational structure illustrates that the Board of Directors shall oversee all operations of Arab Cement Company, ensuring that these operations adhere to the highest standards and align with the Company's overall strategic directions.

The governance structure shall be the executive management after the Board of Directors and its committees, subject to the oversight of the Board, which appoints and evaluates the executive managers and ensures the efficiency of their performance. Both the Board and the executive manager shall focus on developing a governance culture and commitment throughout the Company, and analyzing potential risks.

4. Business Ethics and Compliance

Creating a culture that complies with Business Conduct Policy and the highest ethical standards results in various positive outcomes, including positive stakeholder perceptions, enhancing internal governance, alignment with best practices, strong compliance, positive work environment and investor's trust in ACC's integrity and financial soundness, as strong compliance with ACC regulations and internal bylaws by all employees, including Top Management, helps achieving interests of all related parties and shareholders in particular, without a conflict of interest, along with a great deal of transparency.

ACC is proud to comply with such above-mentioned opinions and practices regarding the critical importance of ethics, and has the following policies approved by the Board of Directors:

- a. Code of Conduct Policy
- b. Policy of Conflict of Interest and Handling Potential Conflict of Interest (including examples of conflict of interest).

- c. Anti-Fraud & Whistleblowing Policy
- d. Disclosure & Transparency Policy.

ACC complies with business standards in accordance with the terms of reference of its operations, which reflects a fair and positive work environment. With regard to communication, our business standards are communicated to all employees in both Arabic and English. In addition, ACC demonstrates integrity and compliance in its financial statements, as evidenced by its auditing practices. It should be noted that ACC complies with regular rotation of external audit partners so as to ensure impartiality and independence of external auditors upon performing financial statement preparation and auditing.

5. Conflict of Interest

ACC and its Board focus on interests of shareholders, and ACC seeks to avoid actual or apparent conflict of interest in personal or professional relationships. In addition, each Board Member shall bear responsibility towards ACC and related parties. Special procedures are also applied to the highest governance bodies in ACC to ensure avoiding and handling any conflict of interest. To this end, ACC has developed and applied Conflict of Interest Policy. Furthermore, ACC audits transactions with the related parties in a manner commensurate with nature of ACC transactions and projects according to market regulations. In addition, such Policy and accompanying procedures aim to achieve justice and transparency, prevent conflict of interest and misuse of internal information, in addition to ensuring independence of Board Members.

Conflict of Interest Policy also stipulates disclosing interest of any employee, Board Member or family member in any contract or transaction with ACC. In addition, the related parties may not participate in decision making or vote on any decision related to such interest.

In the Annual Report of Board of Directors, the following details shall be disclosed comprehensively:

- a. Business or contracts to which ACC is a party or involve an interest for one of ACC Board Members, Senior Executives or any person having a relationship with any of them.
- b. Any interest, contractual securities and rights offering attributed to ACC Board Members, Senior Executives and their relatives in shares or debt instruments of ACC or any of its subsidiaries, or any change in such interest or such rights within the last fiscal year.
- c. Any interest, contractual securities and rights offering attributed to Senior Executives and their relatives in ACC shares or debt instruments.
- d. Any deal between ACC and a related party.

ACC published the “Regulations of Controls and Standards for Participation in Businesses Competing with the Company’s Businesses” on the company’s website during 2023 AD.

There were no deals in 2023 AD.

6. Whistleblowing

ACC complies with strong transparency and compliance standards and practices. To this end, the Board approved "Anti-Fraud & Whistleblowing Policy" that sets out the regulatory procedures for reporting any misconduct or suspected act that occurs in ACC premises and workplaces, as ACC takes the correctives actions timely. In addition, this Policy allows all employees, including Top Management and Board Members, to express any fears or misconduct that they face without disclosing their identity, while ensuring their protection.

As stipulated in "Anti-Fraud & Whistleblowing Policy", misconduct acts that ACC may handle include: Job fraud (including corruption, embezzlement and financial statement manipulation), inappropriate behaviors by any employee, such as violence and harassment, and any illegal acts related to safety and security, in addition to environment. After misconduct report is issued, a formal investigation shall be performed. Based on level of misconduct, the disciplinary procedure shall be taken in accordance with the Saudi Labor Law.

7. Risk Management

ACC seeks to systematically identify risks that include such risks that could result in business failure, damage to reputation, financial loss, decreased productivity, injury, etc., in order to effectively limit or minimize the negative impact. In addition, ACC defines risk management as knowledge, capabilities and practices integrated with the developed strategy and their application in order to manage risks when creating, maintaining and achieving value.

ACC determines and classifies risks that it faces, and assesses their contingency and potential impact, while conducting appropriate responses. ACC periodically monitors and reports risks that it faces to all ACC involved persons and Risk Management Committee.

With regard to risk governance, Risk Management Committee supervises implementation of Risk Management Strategy. In addition, Risk Management Strategy sets out key business risks to help ACC achieving its strategic objectives and maintaining risks within acceptable levels within limits of risk appetite. According to Governance Regulations, the tasks of Risk Management Committee are briefed as follows: -

- a. Developing a comprehensive risk management strategy and policies that comply with the nature and size of ACC's activities, verifying their implementation, reviewing, and updating them based on ACC's internal and external variables.
- b. Determining and maintaining an acceptable level of risks that ACC may be exposed to and checking that ACC has not exceeded it.
- c. Ensuring viability of ACC continuation and the successful continuation of its activity, preventing identification of risks threatening its continuation over the next 12 months.
- d. Supervising ACC's risk management system and assessing effectiveness of systems and mechanisms for identifying, measuring and monitoring risks to which ACC may be exposed in order to identify shortcomings.
- e. Periodic reassessment of ACC's tolerability of risks and exposure to such risk.
- f. Preparing detailed reports regarding exposure to risks and the proposed steps for managing these risks and submitting such reports to the Board.

- g. Submitting recommendations to the Board on issues related to risk management.
- h. Ensuring availability of sufficient resources and systems for managing risks.
- i. Reviewing organizational structure of risk management and making recommendations regarding it before being approved by the Board.
- j. Ensuring that risk management personnel are independent from the activities that may result in exposing ACC to risks.
- k. Ensuring that risk management personnel understand the risks surrounding ACC and working on raising awareness of risk culture.
- l. Reviewing issues raised by Audit Committee that may affect risk management in ACC.

In the Annual Report of the Board, the key risks that ACC face shall be disclosed comprehensively.

Each ACC department head is responsible for managing risks related to nature and objective of his work, as the Chief Financial Officer is responsible for managing financial risks, and Procurement Manager is responsible for procurement-related risks, and so on. ACC conducts in-depth due diligence on new business partners to monitor and assess any potential risks that may arise, such as:

- a. Reviewing legal documents of potential business partners, including Articles of Association, licenses, authorized signatory document, etc.
- b. Auditing primary and reference information that includes assessing nature of new business partners, their sector of work, performance and financial health.
- c. Ensuring that counterparty's activities are appropriate and consistent with ACC's values and business practices.
- d. Verifying whether legal claims have been filed against the company.

8. Investor Relations

The years 2023 and 2022 demonstrated a positive leap in investor relations due to resuming various projects in the Kingdom after Coronavirus Pandemic (Covid-19). This leap is largely due to the efforts of Investor Relations Department in maintaining continuous and consistent communication with ACC's stakeholders. Thanks to ACC Investor Relations Department, we were able to establish and provide effective financial communications for current and potential investors, employees and Management regarding ACC's compliance with Capital Market Authority (CMA) and standards related to environmental, social and governance (ESG) practices.

ACC Investor Relations Department has always been a hub for ACC's communication regarding ESG practices, and for handling ESG concerns of stakeholders.

ACC is keen on maintaining rights of its shareholders through Shareholder Right Policy, General Assembly, Disclosure & Transparency Policy and other relevant policies in ACC Governance Regulations approved by the Board on December 03, 2017 AD as briefed below:

- a. The Policy aims to ensure ACC's compliance with respecting and maintaining rights of shareholders in accordance with the relevant laws, instructions and regulations.

- b. ACC Board complies with developing standards for maintaining rights of all shareholders, while updating such standards, when required, to reflect amendments introduced to provisions of the law, regulations and instructions issued by the relevant regulatory authorities.
- c. The Policy covers general rights of shareholders, rights of shareholders in General Assembly Meetings and maintenance of shareholder information.
- d. The Policy provides for restrictions of voting rights that are based on numbers of owned shares.
- e. The Policy determines restrictions to shareholders' right to hold a general/special or emergency meeting or request based on number or rate of owned share.
- f. Cumulative voting is used in electing ACC Board.

Statement	2023	2022
Number of Ordinary General Assembly Meeting throughout the year (Meeting No.)	2 (67 & 68)	1 (66)
Number of Extraordinary General Assembly Meeting throughout the year (Meeting No.)	0	0
Mechanism of holding Ordinary General Assembly Meeting	Via video conference and using Tadawulaty Platform	Via video conference and using Tadawulaty Platform
Percentage of shareholders attending Ordinary General Assembly Meeting	20.58%	18.92%
Number of shareholders attending Ordinary General Assembly Meeting	313 339	340
Number of Extraordinary General Assembly Meetings	1	0
Percentage of shareholders attending Extraordinary General Assembly Meeting	25.76%	N/A

9. Responsible Procurement

ACC recognizes that the responsible procurement is an integral part of the approach towards ESG practices. In addition, ACC believes that it is necessary to ideally incorporate ESG practices in all levels of ACC's supply chain by maintaining integrity, transparency, human rights and environmental responsibility through various procurement processes. Therefore, ACC continually assesses communication with various suppliers and maintains good relationships to ensure meeting highest purchase standards. What distinguishes ACC's efforts to meet such ambitious standards is various procurement practices performed throughout 2022 AD, which are as follows:

- a. Compliance with ISO 9001 — Quality Management System and conduct internal and external auditing on an annual basis to assess level of compliance with quality standards.
- b. Prefer dealing with suppliers who comply with high-quality standards and who do not have a history of unethical practices.
- c. Not to deal with any supplier proven with evidence to violate human rights or forced labor issues.
- d. Not to deal with any supplier proven with evidence to have a negative environmental impact in supply chain.

ACC also deals with suppliers regarding risks related to ESG practices and ensures conducting a check and assessment of suppliers and risk assessment before selection. In addition, selection process includes the below-mentioned procedures:

- a. Obtaining no less than three proposals within selection process.
- b. Requesting relevant legal documents from potential suppliers and assessing processes of validating primary information and previous authorization documents of suppliers.
- c. Using evaluation criteria such as pricing, quality, product availability, performance and customer service ability, etc.
- d. Assessing supplier's goodwill in domestic and international market, ethical and environmental standards regarding environmental and social risks.

ACC's continuing impact extends to supporting local economy through local procurement. In 2023 and 2022, more than 60% of procurement expenses were in the Saudi market.

10. Licenses, Permits and Certificates

ACC obtains and maintains various legal permits, licenses and approvals regarding its activities. Such licenses include but not limited to: Ministry of Industry and Mineral Resources (MIM) National Industrial License, Ministry of Commerce (MC) Company Registration Certificate, Trademark Registration Certificate, Saudization Certificate, Zakat Certificate, VAT Registration Certificate, Social Insurance Certificates, environmental license for operations issued by the National Center for Environmental Compliance Control.

ACC's failure to renew its current licenses, permits and certificates or obtain any of licenses necessary for its business, or if any of its licenses is suspended or expires, or if any of such licenses is renewed pursuant to conditions inappropriate for ACC, or if ACC is unable to obtain additional licenses, permits and certificates that may be required in the future, may expose ACC to stop and refrain from performing its business, such as closing ACC or freezing all services that the regulatory authorities provide to ACC (such as renewal or licenses and certificates and issuing visas, residence permits, transfer of sponsorship, etc.) or may expose ACC to fines imposed by the entities having a relevance to licenses, permits and certificates, which will result in interruption of ACC's operations and incurring additional expenses that will, in turn, adversely impact ACC business and outcomes of its operations, financial position and forecasts.

11. Zakat and Tax Status

ACC has completed its zakat status up to the year ending on December 31, 2013, submitted its zakat returns for the years ending on December 31, 2014 to 2018, and obtained the unrestricted zakat certificate for the year 2018.

The Zakat, Tax and Customs Authority issued the Zakat assessment for the years ending on December 31, 2014 to 2018, which showed due Zakat differences amounting to 16.4 million Saudi Riyals. ACC settled the Zakat differences due on uncontested items amounting to SAR 2.6 million during the year ended December 31, 2020. It objected to the Zakat assessment and the Authority issued the amended Zakat assessment, which showed a decrease in Zakat differences by 3.5 million Saudi Riyals.

The Company has submitted the Zakat returns for the two years ended 31 December 2019 and 2020 and obtained the unrestricted Zakat certificate for the year 2020.

The Zakat, Tax and Customs Authority has issued the Zakat and withholding tax assessment for the two years ended 31 December 2019 and 2020, which showed the total differences in Zakat and withholding tax due and a delay fine of SAR 1.8 million. The Company has filed an objection on the zakat assessments for the mentioned two years and paid the zakat due on the non-objectionable items in the amount of SAR 83 thousand, in addition to paying the maximum amount of zakat differences due under the zakat assessment at 25% according to the Regulations, which amounts to SAR 414 thousand.

Zakat Authority issued the amended Zakat and Withholding Tax assessment for the two years ending on December 13, 2019 and 2020, which showed a decrease in the differences in Zakat, withholding tax and late payment penalty by an amount of 447 thousand Saudi Riyals, so that the amount under the amended assessment became 1.07 million Saudi Riyals. ACC escalated the aforementioned objection to the Tax Violations and Disputes Settlement Committee for consideration.

The Tax Violations and Disputes Settlement Committee issued two decisions related to ACC's objection for the two years mentioned to reduce the entire Zakat differences by an amount of 1.07 million Saudi Riyals. The Authority appealed the two decisions mentioned above to the Appeal Committee for Settling Tax Violations and Disputes to consider them and issue a decision thereon.

The Authority submitted an additional appeal memorandum stating that its appeal for the two years mentioned above had been dismissed, and the First Appellate Division for Income Tax Violations and Disputes issued a decision accepting the Authority's abandonment of its appeal against the decision of the First Division for Settling Income Tax Violations and Disputes for the two years mentioned. Accordingly, the Zakat status of the company for the two years ending on 13 December 2019 and 2020 AD is considered completed.

4. Environmental Practices at ACC

Environmental Practices at ACC

Environmental Measures and their Impact

ACC is aware of the global environmental situation and the impact of cement and building materials production on such situation. Therefore, ACC seeks to be among the Saudi industrial companies that provide solutions for environmental problems instead of increasing such problems. ACC's normative efforts, continuous assessment of cement production performance, implementation of energy and water efficiency and waste reduction strategies contribute to achieving ACC's environmental goals of decreasing energy and water consumption, landfill waste, greenhouse gas (GHG) emissions and carbon emissions, as such efforts also contribute to improving air quality and cost reduction goals.

One of ACC's strategic objectives is to support sustainable development of environment and society and compliance with the relevant regulations. In addition, ACC has adopted the following policies and trends to achieve this objective.

1	Applying laws, standards and technologies of preserving environment and natural resources.
2	Using best security and safety methods in ACC's facilities to maintain employees' health and safety
3	Raising awareness of and training ACC's employees on applying standards and laws related to environmental preservation.
4	Using best alternative energy sources.
5	Using best technologies for industrial waste recycling.
6	Using best technologies to limit emissions resulting from operations.
7	Working on providing a healthy environment for ACC's employees and residents

Driven by ACC's policy of commitment to preserving environment in such manner that demonstrates its leadership responsibility; therefore, ACC has allocated high financial budgets for this topic over the past and future years without interruption through plans, during which many projects have been implemented to decrease emissions and are in line with limits of the National Center for Environmental Control and Compliance "NCEC".

In 2023 and 2022, no penalty or violation was imposed on ACC by any entity in the Kingdom of Saudi Arabia regarding environment.

1. International Conventions and Treaties to which the Kingdom is a Party

The Kingdom of Saudi Arabia participates with the international community in its tireless efforts aimed at protecting international environment within the framework of principles governing joint international action. The Kingdom is also a party to international conventions aimed at protecting environment, including the United Nations Framework Convention on Climate Change and (Kyoto) Protocol to which the Kingdom has joined before its entry into force. Accordingly, Royal Decree No. 5/B/5635, dated 14/04/1410 H, was issued providing for restructuring the Kingdom's environmental policies through

the formation of an environmental ministerial committee, which is the Kingdom’s highest environmental authority, and its tasks are limited to determining the Kingdom’s situation on environmental issues at the national, regional and international levels. The regional and international environmental conventions that the Kingdom of Saudi Arabia has signed or ratified and related to ACC’s activity include the following: -

Convention	Signature Date
International Convention for the Prevention of Pollution of the Sea by Oil	1954
Convention on the Prevention of Marine Pollution by Dumping of Wastes and Other Matter	1972
Vienna Convention for the Protection of the Ozone Layer	1985
Montreal Protocol on Substances that Deplete the Ozone Layer	1987
United Nations Framework Convention on Climate Change	1992
Kyoto Protocol to the United Nations Framework Convention on Climate Change	1997
Signing United Nations Framework Convention on Climate Change	1993
Ratifying Kyoto Protocol to the United Nations Framework Convention on Climate Change	1994
Stockholm Convention on Persistent Organic Pollutants	2001

2. Environmental Registers

In 2023, ACC entered into a contract with a Saudi specialized company to prepare its environmental registers and measurements according to standards of Occupational Safety and Health Administration (OSHA) and the National Center for Environmental Compliance Control (NCEC). This company shall prepare a quarterly report.

#	Item	Description	Standards	Outcomes
1	Air Quality	Work Environment Measurements (Gases and Suspended Particles)	OSHA	<ul style="list-style-type: none"> ACC uses optical measuring devices to periodically measure dust rising from the main chimneys of fifth and sixth lines, which have been calibrated by the largest international companies. ACC also conducts a number of periodic chimney measurements, from time to time, using one of the graph metric measuring devices, in addition to measuring air quality inside the plant and residential city.

				<ul style="list-style-type: none"> • Work environment gas concentrations are within OSHA limits for plant's site work environment. • Concentration of suspended particles PM10 and 2.5PM for work environment of measuring locations is less than OSHA limits.
		Suspended particles of surrounding environment	NCEC	<ul style="list-style-type: none"> • Concentration of suspended particles per microgram/cubic meter next to raw materials warehouse area of ACC plant is less than the NCEC permissible limits. • Concentration of suspended particles per microgram/cubic meter in the residential area of ACC plant is less than the NCEC permissible limits
2	Noise	Inside Work Environment	OSHA	The noise existing in the majority of sites is within the normal and safe limits permitted within work environment according to OSHA and NCEC, except for some increased measurements near some areas due to nature of their work, such as the area of crushers and mills. In addition, ACC takes safety measures to protect workers inside the site by wearing earplugs and taking into account organizing work shifts and periods of exposure to noise levels by giving workers rest during work periods and avoiding continuous exposure to a persistent level of noise
		Outside Work Environment	NCEC	
3	Chimney Measurements		NCEC	<ul style="list-style-type: none"> • Average concentration of suspended particles inside chimneys of fifth and sixth lines per gram/ton is less than NCEC permissible limits. • ACC installed modern and highly efficient precipitators to decrease dust emissions from the main chimneys to less than 30 mg/m³. • Maintenance Department maintains and cleans fabric and electrostatic filters that remove dust from gases collected from raw material mill and furnace. • ACC, from time to time, conducts a number of periodic chimney measurements using one of gravimetric measuring devices, in

				addition to measuring air quality inside the plant and residential city.
4	Water Analysis		NCEC	<ul style="list-style-type: none"> • ACC operates a desalination plant using reverse osmosis technology to meet its requirements for pure water uses. As is the case in desalination plants, two types of water are produced: The first is salt- free water that is used for various purposes, while the second type is high-salinity water that is disposed in an environmentally sound manner. • The expected environmental impacts of seawater desalination plant's downstream do not outline significant pressures on marine environment or on occupational health and safety and are compatible with local and international environmental standards as long as ACC abides by all conditions, standards and specifications of return line, method of its implementation and plan for mitigating negative impacts.

The two reports provided for a set of recommendations for development and improvement, and work is underway to implement such recommendations.

3) ISO Certificates

ACC has achieved a pioneering achievement some time ago by obtaining the following:

- a. The international standard ISO 14001: 2015 - Environmental Management System (EMS) ISO 14001 from TUV NORD Saudi Arabia
- b. The international standard ISO 9001: 2015 - Quality Management System (QMS) ISO 9001 from TUV NORD Saudi Arabia

ACC abides by all requirements of the international standard for Environmental Management System (EMS) and the international standard for Quality Management System (QMS), and annually conducts an internal and external audit to assess the level of compliance with standard's requirements.

4. Energy Consumption

Since ACC is a company that produces cement and building materials, as it works on large and energy-intensive projects, this makes it is necessary to decrease energy consumption in production processes as one of ACC's ongoing commitments.

ACC has developed key performance indicators “KPIs” to monitor its energy efficiency, including measuring:

- | |
|--|
| <ul style="list-style-type: none"> - Behavioral changes on site upon request. - Water Treatment Efficiency (Ukg/TRH) - Reverse osmosis water uses for water make-up system applications (HVAC Make Up). - Total Energy Consumption in the site - Total Annual Energy Costs (SAR) - Energy Efficiency (KWh/TRH) - Decreasing carbon emissions (MT CO2) |
|--|

ACC adopts digitization and automation efforts and initiatives, such as various systems, software and Apps used in all activities, which achieves many results, including resource efficiency and environmental consequences of consumption saving.

5. GHG Emissions

Applying ESG practices to be the basis of ACC’s strategy stimulates ACC to measure GHG emissions periodically in order to mitigate such emissions.

Scope 1 emissions are considered an important indicator of direct GHG emissions that are direct emissions from sources owned and controlled by the reporting enterprise. As for ACC, such emissions result from ACC’s internal operations that primarily arise from combustion of fuel in standby generators and fuel used in ACC’s equipment and vehicles.

	Carbon dioxide emissions (TCO2E)	
Scope 1 Source	2023	2022
Generators	339,391	343,879
Owned equipment and vehicles	1458.48	257.75
Scope 1 Total		

As for ACC’s indirect emissions from Scope 2, such emissions are indirect emissions from sources that include purchase of grid electricity.

	Carbon dioxide emissions (MTCO2e)	
Scope 1 Source	2023	2022
Scope 2 (MTCO2e) Total	3271219	3197671

On 14/02/2019 AD, ACC obtained an exemption from obtaining an electricity generation license from “Electricity & Co-Generation Regulatory Authority (ECRA)” in order to perform electrical activity to own, install, and/or operate and maintain generation station of ACC’s plant in Rabigh Governorate.

6. Waste Management & Recycling

As part of ACC's ESG strategy, ACC is committed to disposing of its wastes responsibly in line with its efforts to conserve natural resources, minimize landfill wastes, and ultimately decrease GHG emissions.

ACC adopts continuous improvement processes to decrease / recycle wastes, and such wastes are monitored in a technical manner and through operating system.

In addition, ACC's recycling process includes operational wastes and industrial wastes, as ACC recycles scrap materials (such as: metals, carton and wooden pallets). Moreover, ACC seeks, through waste collection, to meet international standards.

ACC has contracts with qualified contractors to dispose of wastes in permitted places and elsewhere to collect and sell such wastes to scrap contractors quickly to prevent their accumulation.

Below are details of ACC's steps regarding key wastes:

- A. **Liquid Wastes:** The wastewater of plant and residential city is collected and sent to plant's wastewater treatment plant. In addition, a company specialized in operating and maintaining wastewater plant is responsible for transporting and disposing of sewage sludge in a safe manner and through licensed leaching tanks designated for removing sludge.

The total sewage discharge from the plant and the residential city during 2023 amounted to 250 cubic meters/day.

- B. **Solid Wastes:** Solid waste includes paper, plastic, organic materials, wood, glass, metals and other materials. In addition, such wastes are disposed by specialized companies with which contracts have been made, and such wastes are disposed in a site designated for that purpose by the municipality.

- The total amount of solid waste that may be produced by the plant and the residential city during 2023 was 1.5 kg/person/day.

- The total waste removed by the contracted company from household waste was 147 tons.

- The total waste removed by the contracted company from Sludge waste was 80 tons

- C. **Hazardous Wastes:** Burnt oils resulting from oil change for power station machines and other operating equipment and machinery, in addition to water mixed with oils and these resulting from cleaning works at power station, are collected inside barrels in an isolated area designated for that purpose. In addition, such oil is collected and delivered to one of the licensed contractors for clinker dust (cement powder). Moreover, such oil is collected using spiral and trough conveyors to the tank of collecting alkaline substances that are deposited in electrostatic filters and then transported by sealed trucks (dumpers) to collection place, where part of bus dust is collected and disposed by selling it to one of the parties for reuse and re-exploitation, and the other part is disposed by backfilling (inside quarry area), while taking into account introducing several measures to decrease the negative impacts resulting from dust emissions by wetting and pressing to form a similar solid layer, provided that once it dries, it is covered with a layer of dirt to prevent dust emission. As for medical wastes resulting from medical clinic in the residential area of ACC's employees and their families, such wastes are delivered to one of the approved companies for safe disposal.

7. Water Consumption and Management

ACC is located in a country that is considered one of the countries worldwide that suffers water stress, with the lowest availability of renewable fresh groundwater per capita compared to other countries; therefore, ACC attaches great importance to water-saving operations. Therefore, ACC enhances its commitment to sustainable resource management and operation through the pioneering water management technologies it uses.

ACC's total water consumption during 2023 amounted to 2,000 cubic meters/day.

5. Social practices at ACC

Social practices at ACC

In the twenty-first century, skilled workers and their productivity are the most valuable assets for any organization, be it commercial or non-commercial. Arabian Cement recognizes the importance of its social assets, from community members to its own employees, in contributing to the Company's achievements. As part of its strategic objectives, Arabian Cement places a strong emphasis on environmental, social, and governance practices, leading community initiatives and taking actions that foster engagement, motivation, satisfaction, and productivity among all employees.

Arabian Cement understands that investing in its employees is crucial for the Company's success. Therefore, it is committed to providing continuous care, attracting and nurturing talent, promoting diversity and inclusion, and creating a safe and comfortable workplace where employees can give their best efforts and dedication.

Arabian Cement has adopted policies and directions to achieve its strategic goal of attracting and retaining talents. These include:

- Modernizing and developing the organizational structure and compensation policies to retain specialized technical personnel, as well as administrative and financial competencies.
- Providing a positive work environment that supports employees, meets their functional and personal needs, and fosters productivity, participation, and responsibility.
- Equipping national employees with the knowledge and skills required to meet future labor market demands.
- Increasing representation of national workers, particularly in leadership positions, to achieve localization goals.
- Implementing robust replacement and succession plans to ensure business continuity. Arabian Cement has an approved social responsibility policy that aims to:
 - Strike a balance between the Company's goals and the broader societal goals.
 - Promote the culture of social responsibility throughout society, contributing to its economic and social well-being.
 - Enhance the Company's competitive position by engaging in educational, cultural, social, and environmental initiatives.
 - Prioritize employment practices, occupational health, safety, environment, and community engagement, aligning with Arabian Cement's rich history.

The Company's Policy covered the following aspects:

- Company's responsibility towards society.
- Corporate social responsibility towards environment
- Company's commitment to employees.

1) Talent Acquisition

Arabian Cement takes pride in its proven track record of attracting and retaining talent, which has been instrumental in driving creativity and innovation within the Company. To maintain this success, Arabian Cement is committed to providing internships for university students and actively participating in career fairs.

	2023	2022
Number of students having interest in Internships at Arabian Cement	15	13

In the year 2023, there was a significant increase in the number of students applying for internships compared to 2022. During these programs, trainees worked within the Company for a specified period, engaging in practical case studies that provided valuable experience in their respective fields of study.

To continuously improve talent attraction and retention, Arabian Cement Company places special emphasis on developing strategic talent pipelines through its annual workforce plan that was created in coordination among department managers. This annual workforce plan forecasts hiring needs, identifies new talent pools, and considers other critical factors. Please refer to the table below for more details on employee numbers:

		2023	2022
Job Nature	Part-time Employee	-	-
	Full-time Employee	457	467
	Field/Cooperative Training	15 Students	13 Students

2) Employee Retention

Although there were 31 workers who left the Company, 19 new employees were hired in 2023, as seen in detail below:

Year	2023	2022
Number of New Employees	19	23
Number of Employees Subject to Rotation	31	20
Total Number of Newly Graduated Employees	4	6

In addition to competitive wages, allowances, and compensation, Arabian Cement Company provides a range of job benefits to its employees. These benefits include social insurance, end-of-service benefits, and health insurance covering death, disability, and effects of war that the employee doesn't engage in. All these benefits are provided in accordance with labor laws and regulations.

3) Performance Management & Succession Planning

Arabian Cement Company believes in a culture of high performance through conducting annual performance evaluations to monitor progress, recognize employees' achievements, and support their continuous improvement. Additionally, the Company provides regular career development reviews and has a comprehensive approach to succession planning. A succession plan has been prepared and approved for sensitive and executive functions within the Company.

In Arabian Cement Company, promotions are based on assessed competencies, achievements of key performance indicators, and pre-set goals. Recommendations for promotions are made by qualified employees and senior management, ensuring a robust succession planning process.

Human Resources Department conducts a workforce burden analysis (WLA) internally based on the inputs provided, and the outputs are followed up by the executive management and the Nominations and Remuneration Committee.

4) Diversity in Workplace

Embracing differences and fostering an inclusive work environment is believed to make companies more flexible, resilient, vibrant, and prosperous. Thus, diversity is highly valued at Arabian Cement Company; it encourages diversity in terms of gender, age, nationality, abilities, and other demographic backgrounds.

Arabian Cement Company's approved professional conduct policy safeguards diversity in the workplace by promoting a culture of mutual respect for different opinions, attracting competent individuals with diverse professional skills, ensuring fairness and equal opportunities, and eliminating discrimination or bias.

In the event of incidents involving discrimination, bullying, or harassment, employees are encouraged to report their concerns to management, which is committed to conduct formal, unbiased investigations to determine appropriate action. Additionally, Arabian Cement Company provides ethical advice through training courses to mitigate such incidents.

It is noteworthy that Arabian Cement Company successfully manages and develops its human capital without any major disputes.

Gender Diversity

Arabian Cement Company actively promotes gender diversity through the formulation of Company policies. Corporate social responsibility (CSR) programs, for example, are implemented to ensure gender equality in the work environment. The Company provides equal treatment and opportunities for women and men, including an equal pay policy. Arabian Cement Company is committed to supporting the skills development and professional growth of women, aiming to increase their representation in administrative, scientific, technological, and engineering positions.

	Year - All Employees	
	Numbers 2023	Numbers 2022
Men	447	456
Women	10	11

	Year – Employees Senior Management Positions	
	Numbers 2023	Numbers 2022
Men	22	7
Women	2	2

Age Diversity

Young talents bring a fresh and innovative spirit, contributing to the success and innovation of the company. To nurture and empower young talents, the Arabian Cement Company actively recruits and supports fresh graduates.

The table below illustrates that a large percentage of employees at Arab Cement Company are under 50 years, highlighting the Company's efforts to strike a balance between employing young talent and experienced experts.

Age Group	Year	
	Numbers 2023	Numbers 2022
Less than 30 Years	41	40
30 - 50	303	292
Above 50 Years	113	135
Total	457	467

Saudization

Arabian Cement Company is committed to local employment with a Saudization rate of over 50%. The Company is classified within the platinum range according to the Nitaqat Program issued by the Ministry of Human Resources and Social Development, as shown in the following table:

	Numbers 2023	Numbers 2022
Saudi	249	259
Non-Saudi	208	208
Total	457	467

People with Special Needs

Arabian Cement Company strives to provide an inclusive and accommodating work environment for employees with different physical abilities. The Company currently employs two workers with special needs and ensures they receive all necessary support and infrastructure requirements.

Preserving Human Rights & Equality

Promoting diversity means ensuring equality in all aspects of the Arabian Cement Company's operations. The Company upholds the principle of equality by providing all employees with employment contracts that guarantee equal benefits.

Arabian Cement Company professional conduct policy covers all employees, regardless of their locations, deeply emphasizing respect, appreciation for dignity, rights, and aspirations of all individuals within the Company. Suppliers working with Arabian Cement Company are also required to comply with this policy.

5) Training & Development

Arabian Cement Company strongly believes in the importance of investing in the skills and knowledge of its employees as a key driver for growth and prosperity. To this end, the Company is dedicated to continuous improvement and capacity building through a wide range of training courses that support employee experience and ongoing education. These courses provide fertile ground for enhancing knowledge, dedication, effectiveness, and overall well-being.

In 2023, Arabian Cement Company provided a total of 150 hours (226 hours in 2022) of training across various administrative levels through 8 courses (13 courses in 2022). This included an occupational health and safety training course for employees at all administrative levels. In 2023, the number of training hours amounted to 8-16 hours per employee in ACC (8-16 in 2022).

Through this training provided in 2023, ACC investment in employee training was approximately SAR 850,000, compared to approximately SAR 600,000 in 2022.

6) Employee Engagement

Employee engagement plays a vital role in achieving employee satisfaction. Arabian Cement Company recognizes the importance of employee opinions and actively encourages their participation in the Company's management. The Company upholds Professional Conduct Policy and Anti-Fraud and Whistleblowing Policy, which emphasize the value of employee contributions and provide multiple channels for feedback and complaints. Employees have the opportunity to seek advice from senior management in the event of emerging problems and provide feedback on the Professional Conduct Policy. Complaint and suggestion boxes are available at the Company's offices and headquarters to receive employee feedback. Additionally, employees can submit reports, suggestions, and inquiries through the Company's internal intranet site or via email to specific departments, such as Legal Affairs of the suggestion, inquiries and information.

Arabian Cement Company values the opinions of its employees, not only to maintain its public image but also to monitor and enhance internal procedures and overall performance. Therefore, the Company conducts semi-annual employee satisfaction surveys to gauge employee engagement levels. These surveys serve as a basis for further improving engagement level, with job satisfaction rate ranged between 88.5% in 2023 (87.34% in 2022). The following items were measured:

- a) Satisfactory system for incentives and rewards.
- b) Transparent career paths and opportunities for promotion.
- c) Quality training programs catering to employees' needs.
- d) Effective communication channels among work teams.
- e) Clear administrative procedures.
- f) Well-drafted and relevant directives to achieve business objectives.
- g) Salary and benefits aligned with academic and practical competence.
- h) Job security and psychological stability.
- i) Respectful and friendly treatment by direct managers.
- j) Direct managers providing work-related directives only.
- k) Efficient and accurate control and evaluation by direct managers.
- l) Provision of appropriate medical insurance.
- m) Equitable distribution of workload among team members.
- n) Open communication about work problems and significant challenges.
- o) Stimulating work environment.
- p) High levels of cooperation among colleagues.

In 2023 and 2022, ACC did not receive any complaint from the employee.

Arabian Cement Company believes in keeping its employees well-informed about Company updates and operational changes. To this end, the Company adheres to minimum notice periods tailored to individual cases' requirements. The Company consistently strives to provide an excellent work environment for its employees, promoting rewards and fostering a comfortable atmosphere.

7) Social Contribution & Impact

Arabian Cement Company is dedicated to fulfilling its social responsibility strategy. It assumes a leadership role in strategic partnerships and provides qualitative support to civil society institutions, through sponsoring various social programs aimed at serving the community and its employees. Collaborating with government agencies, awareness-raising initiatives, and charitable societies is a responsibility and commitment the Company gladly fulfills, in line with its mission towards society. Furthermore, the Company organizes community, cultural, and sporting events, bolstering the positive impact of its programs.

Driven by the belief in its social and humanitarian responsibilities, Arabian Cement Company extends its efforts beyond manufacturing, business, and profits to actively fulfill its social duties based on modern concepts. The Company intensifies its support for society and employees, seeking proactive and effective approaches. It conducts studies to identify programs that contribute to community support and enhance employee job satisfaction.

Arabian Cement Company continuously develops its social responsibility strategy to ensure the depth and influence of its programs. In 2023, the Company implemented 42 (40 in 2022) social and humanitarian activities for the community and its employees, demonstrating its commitment to societal well-being, as shown below:

#	Name of Event or Program	Event
1	Health Promotion Program	Kidney Washing Support
2	Health Promotion Program	Breast Cancer Fight
3	Health Promotion Program	Diabetes Fight
4	Health Promotion Program	Drug Support for All
5	Health Promotion Program	Life Without Obesity
6	Identity and Belonging Strengthening Program	Celebrating the National Day
7	Identity and Belonging Strengthening Program	Ramadan Meeting for Employees and Their Children

34	Various Initiatives	Honoring Quran Memorizers
35	Various Initiatives	Qualification of Job Seekers
36	Various Initiatives	Mosque Care Program

37	Various Initiatives	Revival of Green Rabigh
38	Participation World Days	Environment Week
39	Participation World Days	Arab Children's Day
40	Participation World Days	World Civil Defense Day
41	Participation World Days	Engineering Day
42	Participation World Days	Social Responsibility Day

In general, ACC contributed a total of 42 initiatives and events during 2023.

8) Occupational Health and Safety

ACC worked to develop its health, safety and wellbeing objectives accordingly. The year 2023 has witnessed many accelerated changes in terms of ESG practices, especially with regard to the social factor that includes health, safety and well-being. Since ACC is an industrial company engaged in the cement industry, safety is an integral part of its day-to-day concerns.

Occupational health and safety is an important aspect of a company the size of ACC, which works to provide a safe working environment for its employees and community free from any causes of accidents, injuries, diseases and factors that may lead to harm to humans in terms of public health or safety. Moreover, Administrative Affairs Department conducts annual fire evacuation drills that ensure the readiness of employees in case of a fire. These drills also help all concerned in anticipating and identifying any gaps in fire drills in order to avoid them during actual fire accidents (God forbid).

ACC has more than one insurance policy covering the risks of accidents and natural disasters, as follows:

- Two plant insurance policies represented in all risks are property, damage and collapse of machinery - covering accidents and natural disasters.
- Heavy Vehicle and Equipment Policy - Covers accidents and natural disasters.
- Third Party General Liability Policy - Covers accidents including death, bodily injury and property damage in connection with the work of the Insured or through defects in facilities (excludes employees).
- Collective employee solidarity - Covers death, disability and effects of war without involvement.

9) Security Management.

ACC focuses on security management, where security management plays an essential role in maintaining the comfort of valued stakeholders within ACC's facilities. In this regard, ACC is well prepared and equipped for emergencies through trained security management and health and safety teams.

Also, ACC's actions are further enhanced through its collaboration with several government entities. For instance, in case of any health-related concerns, the Ministry of Health can be contacted.

During 2023, four minor occupational injuries were recorded (three minor injuries in 2022).

Arab Cement Company has a license from the General Directorate of Civil Defense for its plant in Rabigh. The current license expires on 09/03/1448 AH.

Global Reporting Initiative Standards Index

Appendix No. 1

ACC's Key Topics

Appendix No. 3

Economic and Governance Affairs

Overview of the Board of Directors

Ensuring the existence of a representative and diverse board that preserves the production capacity of ACC and enhances a culture of responsibility.

Code of Professional Conduct

Demonstrating ethics, commitment, and transparency throughout all operations and activities of ACC is of utmost importance.

Economic Performance

Based on ACC's strong economic performance in the past year, the Company sees clear flexibility and operational capabilities in its financial metrics.

Procurement Practices

Improving ACC's operational and capital expenses, enhancing inventory usage and selecting local suppliers are fundamental pillars of the Company's procurement strategy.

Data Privacy

ACC believes that stakeholders shall have the right to know how information is collected, analyzed, and used responsibly.

Digital Transformation and IT Update

ACC seeks to automate and develop its operations to increase efficiency across its various processes and have the greatest positive impact on the community

Environmental Affairs

Emissions

By implementing a carbon removal strategy, ACC shall take tangible steps towards reducing carbon emissions.

Energy

ACC's reduction of energy intensity levels is vital in its future planning.

Water

Given the scarcity of water regionally, ACC is committed to monitoring and managing its water flow responsibly and efficiently.

Environmental Policy

Integrating the environmental compliance agenda into all operations of ACC leads to a unified approach to managing environmental affairs across the Company's various operations.

Waste

ACC shall adhere to regulatory requirements related to waste management while achieving its goals of collecting and disposing of waste.

Climate Risk Mitigation

ACC shall invest its resources in climate change adaptation strategies, crisis management plans, and sustainable development projects.

Social Affairs

Diversity and Inclusion

Through diversity and inclusion in the workplace, ACC strives to encourage creative thinking and enhance an appropriate work culture.

Health and Safety

Practices to maintain health and safety always remain a top priority for ACC.

Saudization

ACC aims to employ Saudi citizens in a purposeful and effective manner.

Employment

ACC's employment policies shall align with local and national laws and regulations related to employment practices.

Non-Discrimination

ACC recognizes the value of its most precious assets and strives to provide a workplace for its employees free from discrimination and bias.

Response to the COVID-19 Pandemic

ACC has dedicated its response to the COVID-19 pandemic to protect and assist its employees, customers, and the communities it serves.

Local Communities

ACC is committed to supporting and serving the communities in which it operates, ensuring that its operations do not cause harm to them.

Education and Development

To ensure the ongoing professional development of employees, ACC has implemented a range of training programs that meet the diverse requirements and professional needs of its employees.

Names of companies, inside or outside the Kingdom, in which ACC Board members hold current or former membership, or have or had an executive role
